

NAME(S):

Prompt: What are computers good at?

Good or Poor	Task	Reason
	Calculating the number of times that adenine appears in a DNA sequence that a person writes on a sheet of paper	
	Automatically inventing new designs for commercial products (like car bumpers, dishwasher detergent bottles, etc.)	
	Getting a humanoid robot (i.e. has legs) to successfully go up or down stairs	
	Playing a game of tic-tac-toe	
	Adjust its own behavior when it makes mistakes	
	Finding the factors of a large (200-digit) number. (Recall: the factors of 6 are 1,2,3,6)	
	Recognizing a song after someone hums the tune
