

NAME(S):

Overall - choose 3 topics, 5 pts per topic, for each topic:

State/Describe Topic (3 pt, given 2 page for writing):

- describe this topic in detail, be thorough and focussed
- include at least **2** verifiable pieces of information (avoid quality statements, describe *how* things work, think about what are the most pertinent/important facts to choose to include)
 - it may help to number these statements to make sure you include them
- discuss this topic in the context of bioinformatics, for example connect it to any of the assignments you've done in this class or other applications of bioinformatics you've learned about

State a question that you had after learning about this topic (1 pt, given 1/2 page for writing):

- this does not have to be the question you first included in your notes, but can be
- the question must be answerable, it must have a *correct* answer

Answer the above question. Include reference(s) (1 pt, given 1.5 pages for writing).

- references can be chapters from books, specific web pages, primary or secondary literature
- references must be specific enough that I can find them within a minute of searching
